

EM and Temic Credentials

Datasheet

Introduction

Rosslare offers a large selection of high-quality, long-lasting credentials that are compatible with today's most popular devices and are recognized for their high number of possible reads. The 125 kHz EM and Temic credentials are highly reliable, interference-free, and are ideally suited for a variety of applications and environments while keeping the solution cost-effective.

General Description

The 125 kHz EM and Temic smart card credentials are strong, sturdy, and robust.

The 125 kHz EM smart card credentials are available as an ISO card that can be directly printed on.

The EM credentials are available as an ISO card, a clamshell card, or in a key FOB form factor. The ISO card and clamshell card can be printed on directly. The key FOB has engraved numbers on it.

Main Features

- 125 kHz Smart card technology
- 32 Byte memory
- ISO card and clamshell card form factors with optional inkjet printing
- Twist and ring key fob form factors with optional laser engraving
