

L-11S T

LINEMATCHING TRANS MODULE

The L-11S is a line input module to be used in conjuction with the 900 series components and other TOA's equipment. It has a transformer balanced line matching input with terminal block connector, and mute-receive function.

Key features

- For applications requiring 600Ω line-matching
- Responds to mute bus activation via mute send module or switch-closure
- Transformer isolation (600Ω)
- Connector: removable terminal block
