VSSL

| PREMIUM AUDIO STREAMER | INDUSTRY FIRST POE STREAMER | WORKS WITH VSSL ECOSYSTEM | NATIVE STREAMING™ |

MS.1 AUDIO STREAMER

Introducing the VSSL MS.1, the first modular audio streamer in the groundbreaking MX Series and VSSL's first standalone streaming device. Engineered for seamless integration and effortless installation, the MS.1 sets a new standard in flexibility, performance, and control.

Powered via USB-C or PoE, the MS.1 is the industry's first—and only—PoE audio streamer, offering unmatched versatility in power and placement. With support for HDMI eARC, Optical (ToS link), Wi-Fi, and Bluetooth, it delivers premium audio connectivity options to fit any environment.

The MS.1 features full driver support for leading control systems, including Control4, Crestron, Elan, RTI, URC, Savant, and Lutron, making it ideal for professional installations.

Designed with simplicity in mind, the MS.1 offers easy setup and intuitive operation while maintaining robust performance. It integrates tightly with top streaming platforms like Apple Music, Spotify, YouTube Music, and more, allowing users to stream what they love with minimal effort.

As part of the VSSL ecosystem, the MS.1 connects effortlessly with other VSSL devices through the VSSL CNCT app, creating a unified whole-home audio experience.

The VSSL MS.1 isn't just a new product—it's the beginning of a new era in audio streaming with the MX Series.
