

The SSF-ACS-TOOL Armored Cable Slitting Tool allows quick preparation of armored cables. It is recommended for use with SSF™ Aluminum Interlocking Armored and Armored Corrugated Steel (Direct Burial) cables.

The SSF-ACS-TOOL cuts both outer jacket and armored layers in one operation. This tool can be used with both fiber optic and non-fiber optic armored cables.

The rotatable blade (up to 90°) allows both longitudinal and circumferential slitting.

The SSF-ACS-TOOL is compatible with cables from 0.315 - 1.125 inches in diameter (8 - 28.6 mm).

FEATURES AND BENEFITS

- Adjustable for cables from 0.315 - 1.125 inches (8 - 28.6 mm) in diameter
- Blade rotates 90°
- Adjustable blade depth
- Longitudinal and circumferential slitting
- Roller-style cable follower
- Rugged anodized aluminum and steel construction

COMPATIBLE CABLES INCLUDE

- Armored Direct Burial
- Interlocking Armored

SPECIFICATIONS	
Cut Type	Slit or Ring
Cable Type	Armored Jacketed
Cable Diameter	8 - 28.6 mm / 0.315 - 1.125 in
